IMPLANTS  
HOW PERFECTION IS BUILT

## THE ARCHITECTURE OF PERFECTION

---

As one of the most challenging specialties in aesthetic and restorative dentistry, implants put you and your team to the test. No procedure makes a more dramatic difference in a patient's health and well being. Done right, it can transform a person's life. Done less than perfectly, it can be painful, stressful and costly for everyone involved.

That is why many of the most successful practitioners in the country choose Valley Dental Arts as their laboratory for implants. They come to us not only for the quality of our work, but for the support we provide. It's like the difference between working with an architect and a carpenter. We take the architect's approach because we have found that by being involved with your team in the design and planning of these highstakes cases, we can deliver dramatically better results.

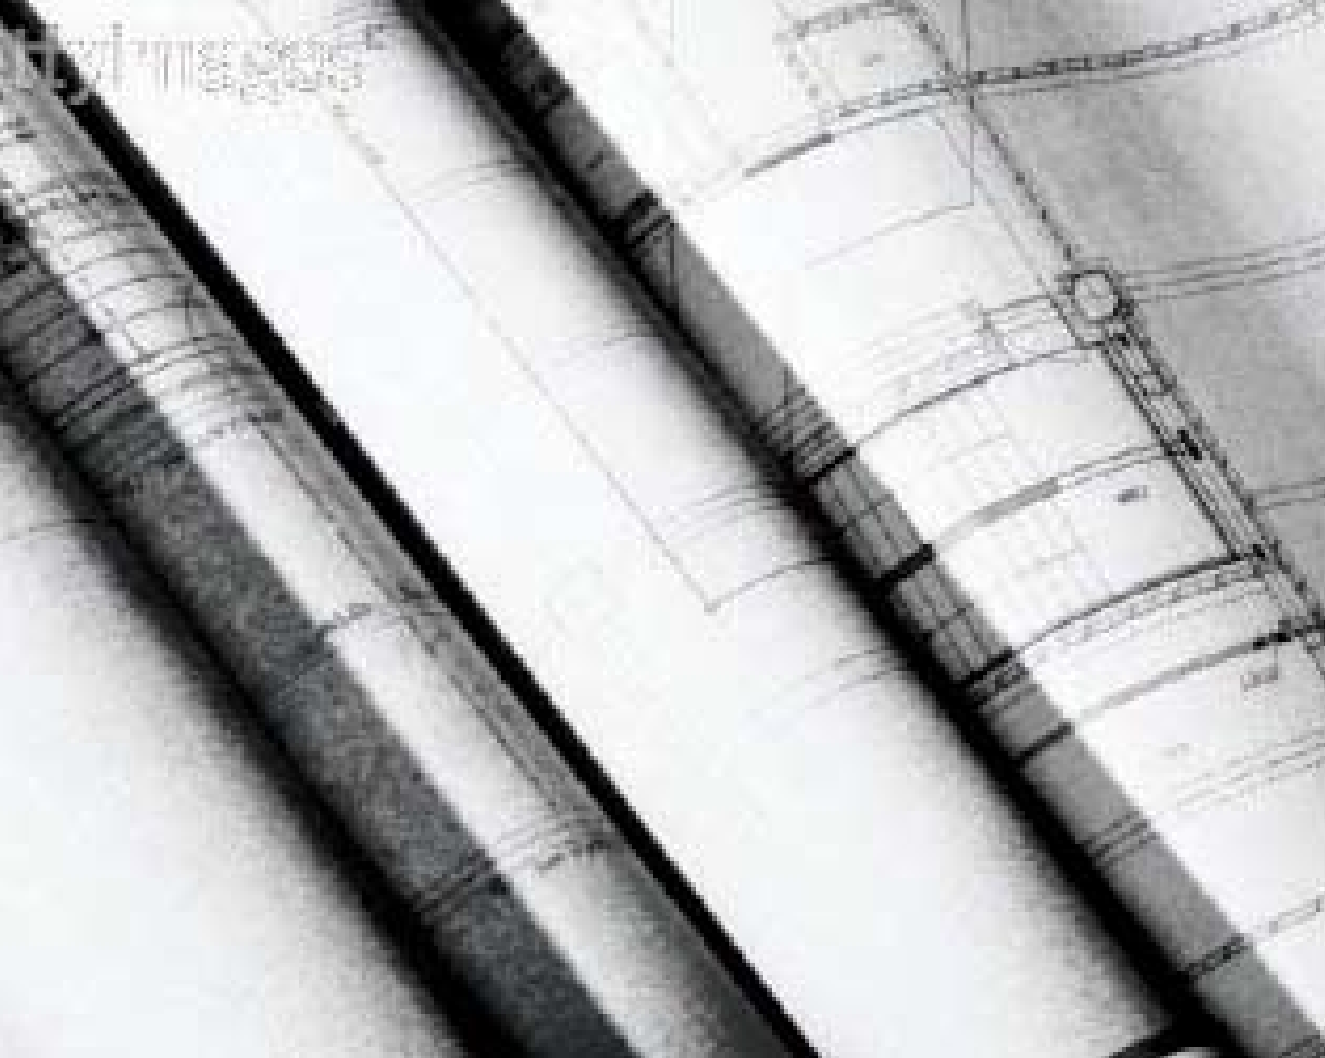

---

## PROBLEM - SOLVING EXPERTISE

“Valley Dental Arts is more than a laboratory.  
It is a resource for knowledge and ideas.”

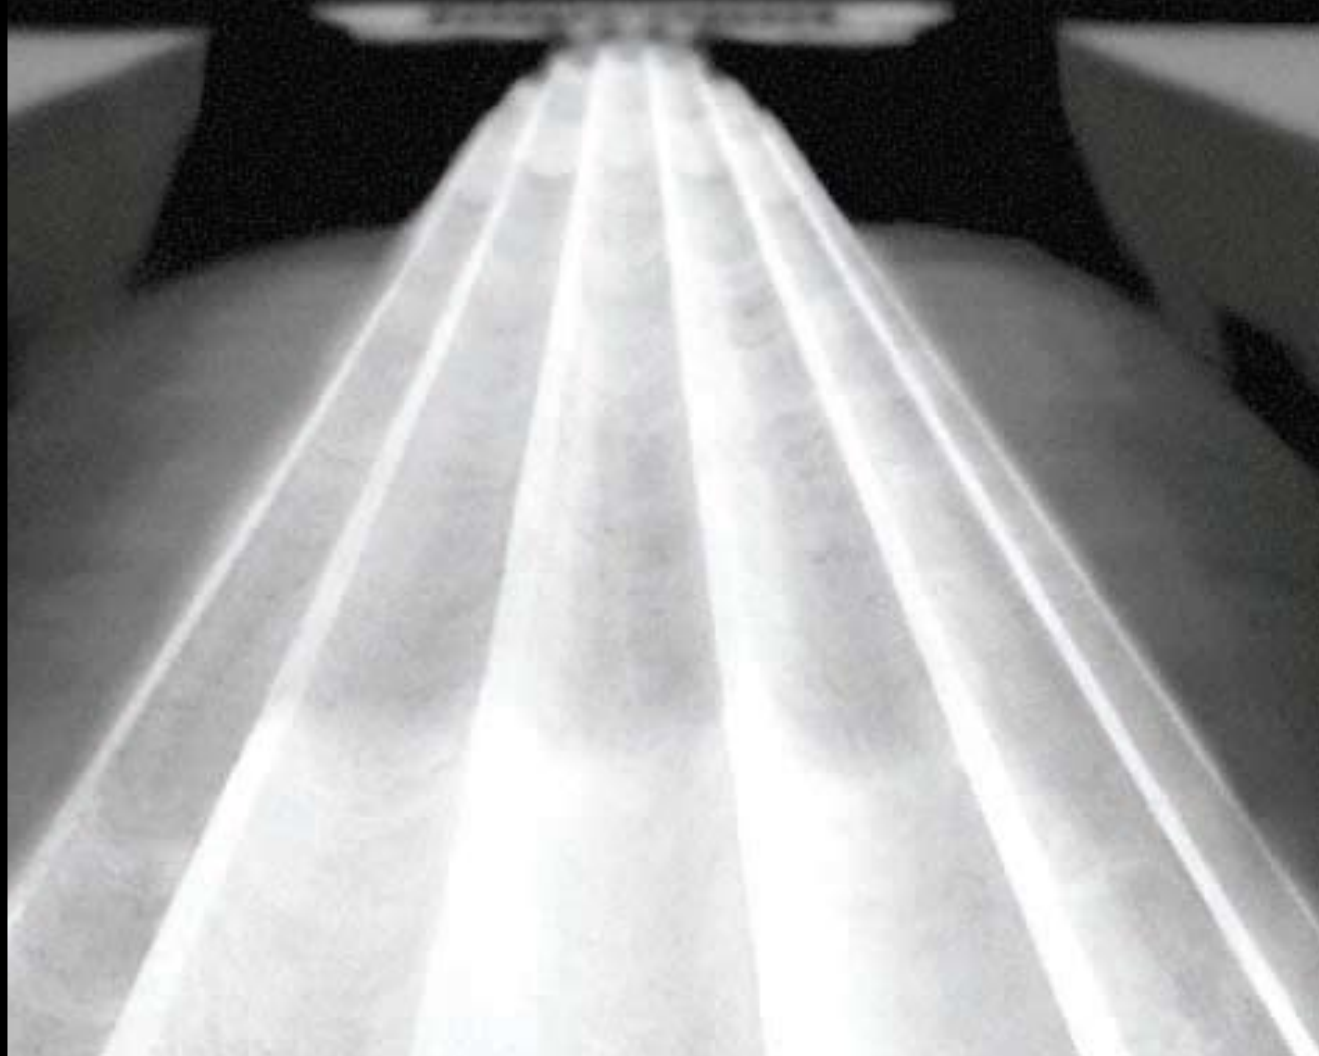

We frequently hear comments like this from the dentists we work with. And we think it's the key to the exceptional outcomes we're able to achieve. We are always available to consult with you to help find the best possible solution for your patient. Our dedicated team of implant specialists has extensive experience in every type of case, from relatively straightforward to the most complex. And they are highly knowledgeable about the latest materials and techniques. Sharing knowledge and solving problems is the essence of what we do. And it's what sets us apart from other labs.

## GETTING IT RIGHT FROM THE START

---

Because meticulous planning and coordination is so crucial in implant cases, we work closely with you throughout the process. This is especially important in the diagnostic and planning stages. By consulting with you early on, we can help you avoid problems that may seriously compromise the final result. Early collaboration also allows us to give you options. We often suggest a range of solutions for a case, so you can select the approach that works best for your patient and your team.

## A BLUEPRINT FOR SUCCESS

---

After reviewing your models and patient photos, we give you an estimate with a detailed treatment sequence showing how we would work with you on the case, when to schedule patient visits, and when the work will be complete. This “treatment blueprint” helps your team plan more accurately – and improve your patients’ experience by letting them know what to expect.

As you move forward with the case, we stay in close contact with you, using digital photography to review the patient’s progress and make whatever adjustments are needed to provide the ideal fit and appearance.

## A PERFECT FIT

---

At Valley Dental Arts we work with extraordinary precision, and nowhere is that more important than with implants. Even the tiniest imperfection makes a significant difference in the fit and longevity of the restoration, and your patient's satisfaction. That is why we work to microscopic tolerances - the tightest in the profession.

When it comes to implants, perfection pays. Like the other dentists we work with, you will find that by offering a higher standard of quality, you attract more - and more discerning clientele.
